Cecal Volvulus: Clinical Image

Nathan C. Claydon¹, Dustyn Baker¹

¹Sierra Nevada Memorial Hospital, Grass Valley, California, USA

A 77 years old female was sent to the Emergency Department from her primary doctor’s office after she complained of 4 days of constipation and abdominal pain. Computed Tomography (CT) scan abdomen was done which showed a Whirl sign indicative of Cecal volvulus. She underwent emergent surgery.

Figure 1: Computed Tomography (CT) scan shows Whirl Sign indicating Cecal volvulus
